## **County Employment and Wages in Alaska – Second Quarter 2015**

Employment increased 0.4 percent in Alaska's only large county, Anchorage Borough, from June 2014 to June 2015, the U.S. Bureau of Labor Statistics reported today. (Large counties are defined as those with employment of 75,000 or more as measured by 2014 annual average employment.) Regional Commissioner Richard J. Holden noted that in June 2015, Anchorage Borough's employment totaled 155,800 and accounted for 45.0 percent of total employment within the state.

Nationally, employment increased 2.0 percent from June 2014 to June 2015 as 319 of the 342 largest U.S. counties gained jobs. Utah, Utah, had the largest percentage increase in employment over the year, up 7.5 percent. Ector, Texas, had the largest over-the-year percentage decrease in employment with a loss of 4.2 percent.

The average weekly wage in Anchorage Borough was \$1,070 in the second quarter of 2015, an increase of 2.1 percent from the second quarter of 2014. Nationally, the average weekly wage rose 3.0 percent over the year to \$968 in the second quarter of 2015. (See [table 1](#).)

Employment and wage levels (but not over-the-year changes) are also available for the 28 boroughs in Alaska with employment below 75,000. Average weekly wages in these counties ranged from \$1,881 to \$529 during the second quarter of 2015. (See [table 2](#).)

### **Large county wage changes**

Anchorage Borough's 2.1-percent wage gain from the second quarter of 2014 to the second quarter 2015 placed 207<sup>th</sup> among the nation's 342 largest counties. (See [table 1](#).) Nationally, 323 large counties registered over-the-year increases in average weekly wages in the second quarter of 2015. Ventura, Calif., ranked first with an increase of 15.2 percent. Santa Clara, Calif., ranked second with a gain of 11.3 percent, followed by the counties of Forsyth, N.C. (10.9 percent); Riverside, Calif. (8.7 percent); and San Francisco, Calif. (8.6 percent).

Among the 342 largest counties, 16 experienced over-the-year decreases in average weekly wages. Olmstead, Minn., had the largest decrease (-5.2 percent). Ector, Texas, had the second-largest wage decline (-5.1 percent), followed by Midland, Texas (-3.2 percent) and Hillsborough, N.H. (-2.6 percent).

### **Large county average weekly wages**

Anchorage Borough's \$1,070 average weekly wage placed in the top 20 percent in the nation, ranking 58<sup>th</sup> in the second quarter of 2015. Nationally, weekly wages were higher than the U.S. average in 102 of the 342 largest counties. Santa Clara, Calif., held the top position with an average weekly wage of \$2,109. San Mateo, Calif., was second at \$1,863, followed by New York, N.Y. (\$1,842) and San Francisco, Calif. (\$1,730).

Over two-thirds of the largest U.S. counties (240) reported average weekly wages below the national average in the second quarter of 2015. The lowest weekly wage was reported in Horry, S.C. (\$568), followed by the Texas counties of Cameron (\$586), Hidalgo (\$614), and Webb (\$651). Wages in these lowest-ranked counties were less than one-third of the average weekly wage reported for the highest-ranked county, Santa Clara, Calif. (\$2,109).

### **Average weekly wages in Alaska's smaller counties**

Alaska consists of 16 smaller boroughs, 11 census areas, and 1 municipality, each of which is considered a county level equivalent. Twenty-two of the 28 counties in Alaska with employment below 75,000 had average weekly wages lower than the national average of \$968. The exceptions were North Slope Borough (\$1,881), Northwest Arctic Borough (\$1,297), Southeast Fairbanks Census Area (\$1,225), Aleutian West Census Area (\$997), Fairbanks North Star Borough (\$991) and Bristol Bay Borough (\$970). The Wade Hampton Census Area reported the lowest weekly wage among the smaller counties, averaging \$529. (See [table 2](#).)

When all 29 counties in Alaska were considered, 6 had wages below \$700. Nine counties had average weekly wages ranging from \$700 to \$799, 3 had wages from \$800 to \$899, 7 had wages from \$900 to \$999 and 4 had wages above \$1,000. (See [chart 1](#).)

### **Additional statistics and other information**

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit [www.bls.gov/cew](http://www.bls.gov/cew).

*Employment and Wages Annual Averages Online* features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2014 edition of this publication, which was published in September 2015, contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2015 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages 2014* are now available online at <http://www.bls.gov/cew/cewbultn14.htm>. The 2015 edition of *Employment and Wages Annual Averages Online* will be available in September 2016.

---

**The County Employment and Wages release for third quarter 2015 is scheduled to be released on Wednesday, March 9, 2016.**

### **Technical Note**

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 9.4 million employer reports cover 137.8 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at [www.bls.gov/cew/](http://www.bls.gov/cew/); however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

**Table 1. Covered employment and wages in the United States and the largest county in Alaska, second quarter 2015**

Area	Employment			Average Weekly Wage <sup>(1)</sup>			
	June 2015 (thousands)	Percent change, June 2014-15 <sup>(2)</sup>	National ranking by percent change <sup>(3)</sup>	Average weekly wage	National ranking by level <sup>(3)</sup>	Percent change, second quarter 2014-15 <sup>(2)</sup>	National ranking by percent change <sup>(3)</sup>
